

AMENDED IN ASSEMBLY APRIL 18, 2016

AMENDED IN ASSEMBLY MARCH 18, 2016

CALIFORNIA LEGISLATURE—2015–16 REGULAR SESSION

ASSEMBLY BILL

No. 2696

Introduced by Assembly Member Beth Gaines

February 19, 2016

An act to add Article 1 (commencing with Section 104250) to Chapter 4 of Part 1 of Division 103 of the Health and Safety Code, relating to diabetes.

LEGISLATIVE COUNSEL'S DIGEST

AB 2696, as amended, Beth Gaines. Diabetes prevention and management.

Existing law establishes the State Department of Public Health and sets forth its powers and duties pertaining to, among other things, protecting, preserving, and advancing public health, including disseminating information regarding diseases.

This bill would require the State Department of Public Health to submit a report to the Legislature on or before January 1, ~~2018~~, 2019, that includes a summary and compilation of recommendations, as specified, on diabetes prevention and management from certain sources, including the University of California and the federal Centers for Disease Control and Prevention. The bill would require the department to, commencing July 1, 2017, annually post on its Internet Web site a summary of the amount and source of any funding directed to, and expenditures by, the department for programs and activities aimed at preventing or managing diabetes.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.

The people of the State of California do enact as follows:

SECTION 1. Article 1 (commencing with Section 104250) is added to Chapter 4 of Part 1 of Division 103 of the Health and Safety Code, to read:

Article 1. Diabetes.

104250. The Legislature finds and declares all of the following:

(a) It is reported that one in seven adult Californians has diabetes, and the numbers are rising rapidly. The actual number of those whose lives are affected by diabetes is unknown and stands to be much higher when factoring in the incidence of type 1 diabetes and undiagnosed gestational diabetes.

(b) California has the greatest number of annual new cases of diabetes in the United States.

(c) The incidence of diabetes amongst all Californians has increased 32 percent over the past decade.

(d) Over 11.4 million people in California have prediabetes, a condition that is a precursor to full onset type 2 diabetes. This suggests that the total population of those diagnosed will continue to rise in the absence of interventions.

(e) The prevalence of diagnosed gestational diabetes in California has increased 60 percent in just seven years, from 3.3 percent of hospital deliveries in 1998 to 5.3 percent of hospital deliveries in 2005, with the federal Centers for Disease Control and Prevention stating that the diagnosis rate could run as high as 18.3 percent.

(f) The fiscal impact to the State of California, including total health care and related costs for the treatment of diabetes, was over \$35.9 billion in 2010.

(g) There is a disproportionate prevalence of type 2 diabetes among Californians who are Black, Hispanic, or of Asian origin compared to the general population. As of 2010, the incidence of diabetes among Black and Hispanic people was nearly double that among non-Hispanic Whites at approximately 14 percent. Asians and Pacific Islanders, in the aggregate, experience higher rates of

1 diabetes than other populations. Certain groups within the Asian
2 and Pacific Islander population experience the highest prevalence
3 and risk overall, including Filipino, South Asians, and Pacific
4 Islanders, who suffer from diabetes at rates of 15 percent, 16
5 percent, and more than 18 percent, respectively.

6 (h) A recent study of a large state with a sizable diabetes
7 population found that the rate of diagnosed diabetes in that state's
8 Medicaid population is nearly double that of its general population.

9 (i) There is no cure for any type of diabetes; however, there is
10 evidence that diabetes can be prevented or delayed in onset through
11 lifestyle changes and medical intervention.

12 (j) ~~Diabetes when left untreated~~ *Diabetes, when left untreated*,
13 can lead to serious and costly complications and a reduced lifespan.

14 (k) Many of these serious complications can be delayed or
15 avoided with timely diagnosis, effective patient self-care, and
16 improved social awareness.

17 (l) It is the intent of the Legislature to require the State
18 Department of Public Health to provide to the Legislature
19 information, including the annual federal Centers for Disease
20 Control and Prevention progress report, on diabetes prevention
21 and management activities conducted by the State Department of
22 Public Health and expenditures associated with diabetes prevention
23 and management activities. These activities are set forth by the
24 State Department of Public Health in the California Wellness Plan
25 2014 and the report dated September 2014 entitled "Burden of
26 Diabetes in California."

27 104251. (a) The State Department of Public Health shall
28 submit a report to the Legislature on or before January 1, ~~2018~~,
29 *2019*, that includes a summary and compilation of
30 recommendations on diabetes prevention and management, if any,
31 from all of the following sources:

- 32 (1) The University of California.
- 33 (2) The federal Centers for Disease Control and Prevention.
- 34 (3) The California Wellness Plan.
- 35 (4) Other statewide diabetes stakeholder groups.
- 36 (5) Other entities identified by the department as having relevant
37 findings and recommendations.

38 (b) The department shall include in the report any
39 recommendations from those institutions on all of the following
40 items:

1 (1) Evidence-based strategies to prevent or manage diabetes.

2 (2) An analysis of the financial impact diabetes and its
3 complications have on the state.

4 (3) Policy recommendations for the prevention and management
5 of diabetes.

6 (c) The department shall also include in the report a description
7 of the existing level of coordination between state departments
8 with regard to programmatic activities and the provision of
9 information to the public regarding managing and preventing
10 diabetes and its complications.

11 (d) Commencing July 1, 2017, the department shall annually
12 post all of the following information on its Internet Web site:

13 (1) A summary of the amount and source of any funding directed
14 to the department for programs and activities aimed at preventing
15 or managing diabetes.

16 (2) A summary of the expenditures by the department on
17 programs and activities aimed at preventing or managing diabetes.

18 (e) (1) The requirement for submitting a report imposed under
19 subdivision (a) is inoperative on January 1, 2024.

20 (2) The report submitted to the Legislature pursuant to this
21 section shall be submitted in compliance with Section 9795 of the
22 Government Code.
